Chairman's Message

Dr. Nalla G Palaniswami,
Chairman,
KMCH Institute of
Health Sciences & Research

Greetings from KMCH Institute of Health Sciences & Research, Coimbatore!

The concept of Pharmacovigilance in India came to limelight way back in 1986 and it has been developed considerably in recent years. Its significance is recognised worldwide in the healthcare system. Many marketed drugs were withdrawn by the regulatory authorities due to adverse drug effects. However there are various challenges which need to be addressed to ensure the safety of medications. The major concerns are invalid and underreporting due to lack of knowledge and training about Pharmacovigilance programme of India to facilitate detection and assessment of drug safety signals.

This CME on '**CURRENT TRENDS IN PHARMACOVIGILANCE**' is being organised to overcome the challenges on Adverse Drug Reactions reporting among the health care professionals by the Department of Pharmacology, KMCH Institute of Health Sciences & Research to commemorate the 'National Pharmacovigilance Day' on 27th July 2019. I would like to extend my hearty adulations to this CME, and hope it will guide and pave way for all the healthcare professionals in implementing the strategies adopted for the efficient and timely reporting of Adverse Drug Reactions.
